

ROADWAY (CLLRL02)

DESCRIPTION

CLLRL02 is designed to replace up to 400W MH, it provides excellent optical performance for a variety of area and road applications. The CLLRL02 series can reduce energy costs by up to 65%, coupled with low maintenance costs, further reducing budget costs, meeting customers' low budgets while having high-quality lighting. It also provides photocell, sensor and surge protection options, as well as excellent lumen maintenance, the CLLRL02 is ideal for sidewalks, parking lots and roads

SPECIFICATION FEATURES

Construction

- Heavy-duty cast aluminum housing and removable door 3G vibration rated to ensure strength of construction and longevity in application.
- Housing is completely sealed against moisture and environmental contaminants.
- EPA: 0.4567

Optics

- Available in IES Type 2, III distribution.
- Offered Standard in 3000K, 3500K, 4000K and 5000K (+/- 275K) CCT and minimum 70 CRI.
- Scalable Lumen Packages from 9,200 to 20,000 Lumens.
- Optics is precisely designed to shape the distribution, maximizing efficiency and application spacing.

Electrical

- Standard drivers feature electronic universal voltage 120-277V, 347V-480V operation.
- Standard 1-10V dimming and 10kA(@120-277V) / 20KA(@347-480V) common and differential- mode surge protection available.
- Greater than 0.9 power factor, less than 20% harmonic distortion, and is suitable for operation in -40°C to 40°C ambient environments.
- LED drivers mount to die-cast aluminum back housing for optimal heat sinking, operation efficacy, and prolonged life.

Lifespan

- Estimated 50,000-hour LED lifespan based on IES LM-80 results and TM-21 calculations.

Certifications

- DesignLights Consortium™ Qualified.
- UL cUL wet location listed.

Note: DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages), refer to www.designlights.org for details.

Warranty

- Five-year warranty.

PHOTOMETRICS

Type 2 optics creates an asymmetric distribution working well in walkway and roadway applications where more light is required "street side" than "house side".

Type 3 optics produces an asymmetrical pattern that directs the majority of the light forward and equally on both sides of the luminaire. In a back-to-back configuration, it creates a rectangular pattern which can extend pole spacings.
