

# LED Wall Light

SL923WMV-15W

Installation Guide

## Model number parameter list:

Item	Model	Input Voltage	Power Factor	Watt	Input Current	Weight
A	SL923WMV-15W	100-277VA	≥ 09	15W	0.5A	0.75Kg

## 1. Introduction

An internal power-factor-corrected switch-mode supply allows it to be used from any nominal 100V-277V, 60Hz AC supply without any variation in light output.

Suitable for use in the following locations: Ambient Temp: -20~+40°C and wet locations

**Note:** Save these instructions for future reference.

## 2. Installation

### WARNING:

To avoid the risk of fire, explosion, or electric shock, this product should be installed, inspected, and maintained by a qualified electrician only, in accordance with all applicable electrical codes.

### WARNING:

To avoid electric shock:

Be certain electrical power is OFF before and during installation maintenance.

Luminaires must be connected to a wiring system with an equipment-grounding conductor.

### WARNING:

To avoid explosion:

\* Make sure the supply voltage is the same as the rated luminaire voltage.

\* Do not install where the marked operating temperatures exceed the ignition temperature of the hazardous atmosphere.

### For supply connections use wire rated for at least 100°C

**Step 1:** Loosen the screws beside the lens and take down the base plate (FIG.1)

**Step 2:** Fix the base plate onto the junction box. (FIG.2)

**Step 3:** Make wiring, refer to the wiring layout FIG.8

(black to line, white to neutral, and yellow/green to ground) (FIG.3)

**Step 4:** Fasten the screws back to the base plate.

**Step 5:** Install Covers (FIG. 4,5,6 and 7)

### After Installation, please:

1. check whether the lighting fixture is firmly fixed.
2. Check whether wires are connected correctly.
3. At last, turn on the power, and check if the lighting fixture works well.  
If not, please turn off the power and contact your sales representative.
